‘SHACK in a PACK’ gives you...

- **AFFORDABLE, QUALITY HOUSING**
Our kit homes eliminate the expense of builders and materials required with customized home construction. Our modular, pre-designed and developed materials ensure value for money without compromising quality.
- **YEAR-ROUND CONTROLLED ENVIRONMENT**
Our superior thermal quality panels are sandwiched between two sheets of pre-painted steel, offering occupants climatic stability all year round without the need for any artificial ventilation.
- **HYGIENE AND EASY MAINTENANCE**
Our panels do not collect dust or grow mould, and are completely vermin proof. To clean, you need only wash with soapy water – inside and out!
- **LIGHTWEIGHT AND SIMPLE INSTALLATION**
Lightweight panels are easy to handle and our snap-click-lock technology works like “Lego”. The interlocking joining system allows quick installation, approximately one week, without utilising any heavy machinery.
- **CHOICE OF COLOURS**
Our product allows you to choose from a diverse range of standard or optional colours, ensuring your home looks great in any setting.
